

TACK SOLUTIONS

The Complete House of Self Adhesive Tapes

Lkj[®]

Prateek[®]

Mr. Bond[®]

PTK[™]

COMPANY PROFILE:

TACK SOLUTIONS has been established by promoter Mr. Prateek Jain, having experience of more than 14 years in the field of various Self Adhesive Tapes. **TACK SOLUTIONS** has been committed to customer satisfaction with the constant drive for excellence in quality, innovation and customer service.

The company is responsive in meeting challenges created by the constantly changing global environment, specializing in adhesive tapes.

TACK SOLUTIONS serves customers in diverse industries, ranging from the online market places to export houses, flexible packaging, label printing & other printing industry, consumer goods, EV Industry, LED TVs, leather goods industry etc.

BOPP PACKAGING TAPES PLAIN, PRINTED & Coloured

- Suitable for carton box sealing & stationary use.
- Various grades available for light, medium & heavy duty packaging.
- Available in bigger lengths of 650meters & 1000meters for automatic dispensing machines.
- Available in various colors, viz. Transparent, Brown, Milky White, Red, Green, Blue, Black etc.
- Printed tapes are efficient general advertising tool, companies logo & message can be printed on the tape up to 5 colors as per your requirement. Reverse printing & HALF TONE effect can also be given as per your choice.
- Standard Message tapes are also available like "Handle with Care" "For export" "OK TESTED" "Fine quality PVC pipes" and many more
- Printed tapes are many time cheaper than sticker.
- BRANDING TAPES also available.

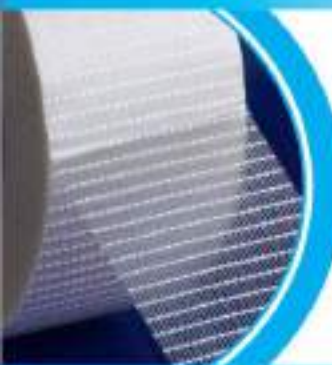

KRAFT PAPER TAPES

- Strong adhesive ability.
- Good performance in re-stripping & packaging.
- Recommended for export packing.
- Environment friendly
- Also used for paper splicing purposes.
- Printed version also available.

REINFORCED PAPER TAPES

- Lamination with fiberglass, especially for reinforced purposes. Very high tensile strength.
- High adhesion. Good packaging results.
- Supreme elasticity without wrinkle formation. Easy to apply
- This tape with fiberglass backing is designed for heavy packaging in economical way.
- Recommended for export packaging.
- Brown and white color available
- Environment friendly, temper proof.
- Printed version also available.

FILAMENT TAPES

A self adhesive tape which has been specially designed for applications requiring a high breaking strength. This tape has a film backing and rubber adhesive. Woven glass fibers reinforce the backing, making this product extremely strong when used for heavy packaging where it can replace metal and polypropylene strapping to great advantage.

- For Packing of Heavy weight cartons
- For Palletizing
- For Strapping
- For sealing of metal coils of pipe bundling.
- Widely used for cricket bat protection.

STRETCH FILM

Stretch film is a highly stretchable plastic film that is wrapped around items. The elastic recovery keeps the items tightly bound.

Functions & benefits:

- Improved stability of products or packages, forming a unit load.
- More efficient handling and storage of unit loads
- Some degree of dust and moisture protection
- Some degree of tamper resistance and resistance to package pilferage
- Some degree of sun protection.
- General purpose and machine grade available.

CLING FILM - MR BOND® Cling film/ food wrap, is a thin plastic film typically used for sealing food items in containers to keep them fresh over longer period of time.

BAG SEALING TAPES

- Used by manufactures of Plastic bags, Resealable bag, Shirt Bags, Stationary goods, Magazines for attractive packaging and where bag can be opened & resealed many times.
- Permanent tape for courier of security bags also available.
- Available in various widths viz 9mm, 11mm, 12mm, 13mm & 15mm.
- Wide width (19mm) also available for bigger bags.
- Various grades available: such as for PP Bags, LDPE Bags, Soft PVC Bags, BOPP Bags etc.

SPF (SURFACE PROTECTION FILM)

We offer a wide variety of superior quality Surface Protection Films, which are widely used for providing complete protection to surfaces from damages.

Features:

- Leaves no glue on the target surfaces • Moisture resistance • High elasticity
- Surface protection film benefits:
- Protect surfaces from pollution, scratches during the process of production, transportation, and installation.
- Leaves no glue on the target surfaces • Our film doesn't just protect the products, it protects them efficiently with a clear film that doesn't sacrifice function for aesthetics.
- Please request for technical & quotation as per your requirement.

Technical specification :

For technical specification in surface Protection film due to different surface all together we require min. 1 square feet pcs of product for trial as per application, then only we can provide specification you are requested to send us your inquiry with complete details.

MR. BOND® MASKING TAPES (PAINTER TAPE)

- MR. BOND® masking tape is a pressure sensitive tape.
- A must have product for carpenters and painters work area.
- Used for Paint Masking, Sunmica Pasting on doors/Almirah/other furniture, used for laminate pasting, used in construction sites and car body repairing and painting applications etc.
- Used widely in Shoe Industry for reinforcements.
- Holds Substrate Firmly.
- Residue Free, easy tear from roll, writable.
- General Purpose and high temperature grades also available

ELECTRICAL TAPES

- **PVC Insulation Tapes:** General Purpose Electrical Tapes used for domestic as well as Industrial use. Various Sizes and Lengths Available. ISI and Non ISI Grades also available
- **Wire Harness Tapes:** Specialised tapes available for automobile and submersible pumps.
- **Polyester Tapes:** Widely used in transformers, capacitors, LED TV's • Available in various sizes and colours
- **Sublimation Tapes:** Widely used for Sublimation Printing, Residue free and does not melt even at a very high temperature.
- **Black Friction Tapes:** Mainly used to insulate splices in electric wires and cables. Because the adhesive is impregnated in the cloth, friction tape is sticky on both sides. The rubber-based adhesive makes it an electrical insulator and provides a degree of protection from liquids and corrosion.

ALUMINIUM FOL TAPES : For general purpose seaming, patching and sealing. • Highly suitable for sealing off air conditioning and cool/warm air flow ducting. • Can be used for both High and Low Temperatures.

- For Sealing Joints in ducting providing a flame retardant and vapor proof barrier.

HEAT SEALING TAPES

Teflon Coated Fiberglass cloth Tape products combine the chemical, electrical and release properties of PTFE / Teflon and Silicone with the mechanical properties of woven fiberglass.

- Excellent chemical resistance.
- Excellent mechanical strength.
- Low friction non-sticking smooth surfaces.
- Dimensional stability under heat and pressure.
- Superior heat and cold resistance.
- Class H Insulation rating (180° C)
- High dielectric strength.
- Low electrical losses-non tracking.
- Also available Nitto 923S  HMTD 02670 for heating rollers.

FLOOR MARKING TAPES

- Identifying lane marking for storage segmentation.
- Uniform thickness and width throughout the length.
- Better performance as compared to paints.
- It is water, weather, acid, alkalis, oil, greases gasoline and abrasion resistant.
- Ideal for ISO 9001, QS 9000 Companies.
- Colors Available: Yellow, Yellow/Black Green, White/Green, Blue, Black, White, Red, Red/White

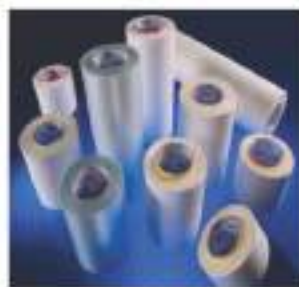

TAPES FOR PRINTING APPLICATIONS/PLATE MOUNTING (FLEXO TAPE/PLASTER TAPE/BLOCK MOUNTING TAPES)

- High quality general purpose flexographic printing tape available.
- Plate mounting tapes for all types of machines including: wide Web, narrow web and letter press. (Economical and efficient than Tessa, 3M and Lohmann).
- Also Available: Highly Specialized tapes of international brands.   

SINGLE SIDED COTTON TAPES

- Single Sided Cotton tapes, made of cotton fabric with rubber based adhesive.
- These tapes are used in motor winding, Shoes industry, packaging and many such specialized applications
- Available in White & Black Color.

PAPER & FILM APPLICATION TAPES

- Available in paper and transparent film.
- Many Grades available.
- The paper products can be used for standard graphical applications and can also be used for laser masking.
- The standard and premium paper application tapes are of very high quality as well as the fill products which are very clear.
- The excellent transparency makes the film range the perfect application tape for multi-color signs.
- Also available application tapes from   

PET PVC PC Films Sheets & Rolls

- PET PVC PC Films Sheets & Rolls Application in Label printing and various packaging industries
- Rigid material in 3 feet x 6 feet Sheet
- **PET SHEETS** available in thickness from 175 microns to 500 microns with single side masking
- **PVC SHEETS** available in thickness of 175 microns to 1mm with single side as well as double side masking
- **Polycarbonate (PC) Sheets** are available in 125 175 and 250 microns with glossy and matte finish
- **Polycarbonate rolls** are available in thickness of 0.030mm to 1 mm

SELF-ADHESIVE LABELS

Labels – the new age branding tool! Our state-of-the-art machinery (European & American) has a flexible configuration that enables us to achieve printing of the highest quality. Substrates and effects we can print and create include metallic foiling, textured finish, embossed effects, surface finish varnish etc., to create an attractive self-adhesive label on Paper, film, and special substrates in both sheet and roll form.

Industries we cater:

- Liquor Industry • Cosmetics
- FMCG • Pharma
- Promotion labels • Scratch & Win Coupons
- Security Labels and many more...

PALLET MASKING TAPE

- **PALLET TAPE** is the ideal platen mask for screen printing. Using pallet tape for screen printing is an easy way to protect your equipment and deliver a better product to your customers.
*Log roll 48" x 100 yards (300 feet)/50 Yards (150 feet)
* Can be sliced in different widths as per customer requirement
- **EXTEND YOUR PALLET LIFE:** Platen tape for screen printing will protect the print surfaces of your textile screen print equipment, making your pallets last longer. Durable pallet tape allows you to use the same pallet for a longer period before it becomes damaged. If the pallet becomes marked, scratched, or warped, it can distort your printings. Often you won't notice the damage until it's too late.
- **CLEAN REMOVAL:** While the adhesive on this pallet tape for screen printing will stay securely in place, it can be removed cleanly and easily: no bubbles, no tears, no marks. This means that not only you do not have to worry about the platen mask moving or coming up before you want it to, you also do not have to worry about the adhesive leaving frustrating, sticky marks behind.

DOUBLE SIDED TISSUE TAPES

Double-sided tape is any pressure-sensitive tape that is coated with adhesive on both sides. It is designed to stick two surfaces together, often in a way which is not visible in the end product, due to it being in between the objects rather than overlaying them. This allows for neater-looking projects and better craftsmanship.

Features:

- Excellent quick double stick, Strong Adhesion, tear by hand, easy release liner.
- Good Shear Strength, excellent solvent and temperature resistance.
- A perfect substitute to replace glue for bonding purposes.
- Non-deteriorating, applicable for decoration, postal service & lamination
- Various grades & Sizes available for different temperatures & surfaces.
- Widely used for splicing purposes.
- Widely used in posters, fancy boxes, envelopes and many such industry.

DOUBLE SIDED POLYESTER TAPES

Self Adhesive tape consisting of a PET backing and modified acrylic adhesive with transparent Red colour PE Liner. Excellent resistance to demanding environment.

- PRATEEK® Double Sided Polyester Tape is a High bond tape used in many applications which require high tensile strength and long term aging.
- PRATEEK® Double Sided Polyester Tape provides a strong rigid bond for most demanding external applications.
- It is excellent for bonding rigid extrusions and is ideal for applications requiring an almost transparent finish.
- Most suitable for fixing of reflections foil to LCD frame, splicing of thin plastic films, and flex to flex joining.
- Excellent handling performance in converting process mounting of metal or plastic badges and signs.
- Various Thickness Available: 130, 160, 180 & 210 microns

MR. BOND® SPLICING TAPES

- MR. BOND® splicing tape is made keeping in mind the requirements of flexible packaging industry.
- MR. BOND® splicing tape has very high tack properties on polyester film base for secure splicing at high speed.
- MR. BOND® splicing tape has special colored polyester for identifying the joint.
- Readily Available Color: Red, whereas other colors can also be made on demand.
- MR. BOND® Splicing Tapes can be used for high-speed flying splices and zero speed splices on most grades of paper such as newsprint, clay coated, corrugated stocks.
- Bond strength is dependent upon the amount of adhesive-to-surface contact developed. Firm application pressure helps develop better adhesive contact and improve bond strength.
- To obtain optimum adhesion, the bonding surfaces must be clean, dry, and well unified.

VARIOUS KIND OF FOAM TAPES

DOUBLE SIDED FOAM TAPES

- Tape with both sides adhesive coating suitable for wall mounts, cable mounts & multi-applications.
- Excellent shock resistance, heat insulating, double stick, ultra flexibility
- Various grades available for wide range of bonding applications.
- Also Available highly specialized foam tapes from 

SINGLE SIDED FOAM TAPES

- Wide range of Single Sided Foam Tapes available in various thickness
- EVA and PE Base foam tapes available with hotmelt, solvent and acrylic based adhesive.
- Single Sided foam tapes are suitable for insulation purposes, Reducing vibration & blocks noise.
- Various foam tapes are Used in HVAC Equipment Panels, fiber free insulation alternative, metal to metal seals/gaskets/gap filler and wrapping chilled water lines
- Single Sided tapes are widely used for fixation of aluminium doors, panels, windows etc.

LKJ® HBA (HIGH BOND ADHESIVE) ACRYLIC FOAM TAPES

- Used in structure glazing, aluminum composite panels, windows and door bonding and many other places
- LKJ® HBA tapes replaces rivets, bolts, welds and other mechanical fixings.
- Also Available in transparent color; this makes it a perfect solution for glass to glass bonding.
- Helps in cost cutting and increase productivity.
- Environment proof
- Available in various thickness: 0.4mm up to 3mm.

COPPER FOIL TAPE

Copper Foil Tape is made of copper foil coated with Pressure Sensitive Glue or Conduct Glue.

- Features:**
- Excellent shielding effectiveness, soldering, and conforming.
 - Antistatic, heat-resistant, waterproof, freeze-proof, solvent resistance.
 - Strong adhesion, easy to use, handle, and die-cut complex shape.
 - EMI shielding. • UV resistance, flame retardant.
 - Moisture resistance, chemical and corrosion resistance. • Heat preservation, heat insulation.

Applications:

- EMI and RFI shielding.
- Applications where static discharge is a concern.
- Printed circuit board manufacture and repair.
- Flexible flat conductors.
- Electrostatic applications.

POLYIMIDE TAPE

Product Description: Polyimide tape has high performance, reliability and durability, with a unique Combination of electrical, thermal, chemical and mechanical properties that can withstand extreme temperature, vibration and other demanding environments.

Features: High Performance polyimide tape offers Heat resistance, High Voltage insulation, acid and alkali resistance, low voltage electrolytic. It is generally used to protect golden finger when PCB is in soldering tin furnace. Insulation of coil, wave soldering protection, electrical insulation, High temperature resistance, Sublimation Printing, residue free.

Applications: • LED Module / Board Bonding. • Efficient Heat Transfer Path between Heat Generating Components and Heat Sinks, Fans, Heat Spreaders, Heat pipes. • IC Chip Packing Heat Construction. • Printed Circuit Board. • Automotive Electronic Thermal Management such as Engine Control Units, ABS systems, Gear Control Units.

ALSO AVAILABLE

- Duct & Book Binding Tapes (All Colors available) • Gasket Tapes • Vent Tapes • Spacer Tapes • Security Tapes
 Anti Skid Tapes • Reflective Tapes • Stationary Tapes • Holographic Tapes • Stationery Foam Tapes
 Tapes for Shoe & Footwear Industry • Tapes for Signage & Label Printing Industry • HDPE Adhesive Tapes
 Thermal Conductive Tapes • Water proof Cotton Tapes • Residue Free packaging Tapes
 • Bubble Sheets/Rolls • Red Tabanera Tapes • Sealants • Primer

Also Available: Highly Specialised tapes of international brands

And their economical substitutes also available.
